

Body Ceutics™

Herbal Body Care for Health & Beauty

Body Ceutics™ were developed to provide spa/clinical quality body care for health and beauty needs. Originally created for the wholesale spa and holistic health care industries, Body Ceutics™ are now available to the public for use in the comfort of your own home.

The Idea

Research shows that up to 60% of what is put onto the skin is absorbed into the bloodstream. If so, why not replace harmful, toxic ingredients with beneficial ingredients and allow those to enhance the health of individuals while beautifying the skin and soothing the soul.

The Science

Body Ceutics™ products consist of specific blends of herbal extracts, essential oils and other nourishing ingredients. Body Ceutics™ uses only natural enhancers, such as certain types of oils, essential oils and more and the formulas have been created in such a way to help the herbal extracts obtain their maximum effectiveness. Combining natural product chemistry, formulation technology and holistic practices creates a high quality, safe and effective body care line for health and beauty.

The Beauty

Body Ceutics™ has customized each line for a spa like experience. Natural herbs, soothing essential oils, nourishing vegetable oils such as safflower, avocado, flax seed along with aloe vera and many other natural ingredients help beautify the skin while helping the body achieve its fullest potential health. Designed initially for spas and wellness centers, these products can be used for massages, masque body wraps, scrub treatments, linen body wraps, whirlpool / bath soaks, hand and foot treatments, scalp and hair treatments and much more. Now with Body Ceutics™ available to the public, everyone can have soothing spa like experiences, beautiful skin and support their health all in the comfort of their own home.

The Lines

Thirteen different lines, totaling 44, results driven body scrubs, body masques, hydrotherapy soaks, serums, massage oils and aromatherapy sprays consisting of up to 25% herbal extracts, 22% pure vegetable oils, 2% essential oils and nutraceuticals. Over 90 different certified organic and wild harvested herbal extracts such as: Ginkgo, Ginseng, Echinacea, St. John's Wort, Peppermint, Lavender, Chamomile, Burdock, Green Tea and Licorice make up our unique body care formulas. Every product is 98-100% natural and delivers active phytochemicals to the skin and body resulting in healthy, glowing beauty that is beyond skin deep. Besides home care, Body Ceutics™ are used in integrative health clinics, massage therapy practices, naturopathic offices, day spas and resorts.
