

MyStory

Customer: Janice Dwyer

Occupation: Restaurant Owner

Location: Sarasota, FL

Problem: feelings of sadness and exhaustion

Products: Revive Energizing lotion, scrub & aromatherapy mist

Over the last few months I had been feeling more and more run down and tired. The stress of having a restaurant and with the lagging economy put me into a state of uneasiness. I considered getting on prescription anti-depressants because it became hard to focus and stay with it during the day to run my restaurant. However, I never was much of a pill popper and didn't think my problems were bad enough to get something that strong. I was looking on the web one day for natural remedies and came across your website. I decided to try the Revive energizing and uplifting care pack. It seemed to be fitting for my needs and since it wasn't a pill it didn't seem as strong with the worry of side effects. I've used the lotion daily and the spray multiple times a day now for about 2 months. I noticed after about 2 weeks that I felt more focused and excited to come into work again. It's been just the little pick me up I needed to get back into the swing of things. I've also noticed that the scrub and lotion have really made my skin soft and smooth. I would recommend these products to anyone as they have worked well boosting my energy and mood naturally and gentle enough to make just the difference I was looking for.
